

Aceclomac Plus Tablets (Blister)

Aceclomac Plus Tablets contain Aceclofenac and Paracetamol. Aceclofenac is a non-steroidal anti-inflammatory drug (NSAID), the glycolic acid ester of diclofenac, while Paracetamol produces antipyresis and analgesia by elevating the pain threshold.

Dosage Form

Tablets

Route of Administration

Oral

Composition

Each film-coated tablet contains:

- Aceclofenac I.P. 100 mg
- Paracetamol I.P. 325 mg

Indications

Indicated for the management of pain and inflammation associated with musculoskeletal disorders, arthritis, back pain, headache, migraine, dental pain, fever, and post-operative pain.

Storage

Store in a cool and dry place.

Precautions

Use only as directed by the physician. Contraindicated in patients with severe peptic ulcer, gastrointestinal bleeding, or known hypersensitivity to any component of the formulation. Caution is advised in patients with liver, kidney, or cardiovascular disorders. Prolonged use or overdose of paracetamol may cause serious liver damage. Do not exceed the recommended dosage.

Presentation

20 x 100 x 10 tablets
