

Amikamac Injection

Amikamac Injection contains Amikacin, an aminoglycoside antibiotic effective against a variety of aerobic gram-negative bacilli including those that are resistant to gentamicin and other aminoglycosides.

Dosage Form

Injection

Route of Administration

IV and IM

Composition

Each 2 ml contains:

- Amikacin Sulphate I.P. 100 mg, 500 mg
- Water for Injection I.P. q.s.

Indications

It is indicated for the short-term treatment of serious infections caused by a broad spectrum of Gram-negative organisms, including Pseudomonas, and some Gram-positive organisms.

Storage

Store in a refrigerator. Do not freeze. Take it out of the refrigerator an hour before the time for the next dose.

Precautions

- Use caution in patients with a history of kidney disease, vertigo, hearing loss, ringing in the ears, myasthenia gravis, or Parkinson’s disease.
- Use with caution during pregnancy.
- Do not use if the solution contains particles or suspended matter.

Presentation

50 × 2 ml, 100 × 2 ml vial
