

Ben Plus Suspension 10ml

Ben Plus Suspension is a liquid formulation of the anthelmintic medication used to treat various parasitic worm infections in humans.

Dosage Form

Suspension

Route of Administration

Oral

Composition

- Albendazole I.P. 200 mg

Indications

Ben Plus Suspension is indicated for the treatment of various parasitic worm infections, including neurocysticercosis, cystic hydatid disease, giardiasis, ascariasis, hookworm infections, and trichuriasis. It helps eliminate parasitic organisms and supports recovery from helminthic infestations affecting different parts of the body.

Storage

Keep away from heat and light. Shake well before use.

Precautions

Use this medicine only under the supervision of a physician. Inform your doctor about any existing liver disorders or other medical conditions before starting treatment. Periodic monitoring may be required during prolonged therapy. This medicine should not be used during pregnancy unless specifically advised by a healthcare professional. Shake well before use and follow the prescribed dosage carefully.

Presentation

10 ml Bottle
