

Betasone-N Drops

Betasone-N eye/ear drops is a medication containing a corticosteroid (betamethasone) and an antibiotic (neomycin sulfate), used to alleviate inflammation and combat bacterial infections in the eyes or ears.

Dosage Form

Eye/Ear Drops

Route of Administration

Ocular/Otic

Composition

Each ml contains:

- Betamethasone Sodium Phosphate I.P. 0.1% w/v
- Neomycin Sulphate I.P. 0.5% w/v
- Benzalkonium Chloride Solution I.P. 0.02% v/v (As Preservative)
- Sterile Aqueous Buffered Vehicle q.s.

Indications

- Treatment of bacterial eye and ear infections where inflammation is also present.
- Relief of redness, swelling, itching, and irritation associated with susceptible bacterial infections.
- Management of steroid-responsive inflammatory conditions of the eye or ear when antibiotic treatment is indicated.

Storage

Store in a cool, dry place below 25°C, protected from light. Keep the container tightly closed and out of reach of children. Follow the storage instructions printed on the product packaging.

Precautions

- Use only as directed by a healthcare professional.
- For eye and ear use only; do not swallow or inject.
- Avoid touching the dropper tip to any surface to prevent contamination.
- Do not use for longer than prescribed, as prolonged corticosteroid use may cause complications.
- Inform your doctor if you have allergies to any of the ingredients.
- Seek medical advice if symptoms worsen or do not improve.

Presentation

10ml plastic vial
