

Burnprotec Cream 15gm

Burnprotec cream is an antimicrobial, analgesic, and antiseptic formulation that helps in the prevention and treatment of infections during the treatment of burns.

Dosage Form

Cream

Route of Administration

Topical

Composition

Each g contains:

- Silver Sulphadiazine U.S.P. 1.0% w/w
- Chlorhexidine Gluconate Solution equi. to Chlorhexidine Gluconate I.P. 0.6% w/w

Indications

Used as a topical anti-infective for dermal injuries. It has a wide antibacterial spectrum, including virtually all microbial species likely to infect the burn wound. Burnprotec cream is used to prevent and treat wound infections in patients with second and third-degree burns.

Storage

Store in a cool, dry place. Keep out of the reach of children.

Precautions

For external use only. Avoid contact with the eyes, mouth, and other mucous membranes. Use with caution in patients with known sulfonamide sensitivity. Do not use in neonates, during pregnancy, or while breastfeeding unless advised by a healthcare professional. Discontinue use and consult a physician if irritation, rash, or allergic reactions occur.

Presentation

15 g cream tube.
