

Cipromac D E/E Drops

Cipromac-D eye/ear drops is a combination of an antibiotic (ciprofloxacin) and a corticosteroid (dexamethasone) medication used to treat bacterial infections and reduce inflammation in the eyes or ears. The antibiotic inhibits bacterial growth, while the corticosteroid alleviates swelling, redness, and discomfort associated with inflammation. This combination is commonly used to manage conditions such as bacterial conjunctivitis or otitis externa, providing a dual-action approach for effective treatment.

Dosage Form

Eye/Ear Drops

Route of Administration

Ocular/Otic

Composition

- Ciprofloxacin Hydrochloride (eq. to Ciprofloxacin) I.P. 0.3% w/v
- Dexamethasone I.P. 0.1% w/v
- Benzalkonium Chloride Solution (Preservative) I.P. 0.02% v/v
- Sterile Aqueous Buffered Vehicle q.s.

Indications

Used for the treatment of bacterial infections of the eye or ear associated with inflammation.

Storage

Store in a cool and dry place away from direct sunlight.

Precautions

Avoid use in patients with hypersensitivity to ciprofloxacin, dexamethasone, or any component of the formulation, and do not use for viral or fungal infections unless specifically advised. Prolonged use may promote secondary infections. Remove contact lenses before ocular use and wait at least 15 minutes before reinsertion. Use with caution in corneal ulcers, and consult a healthcare professional before use during pregnancy or breastfeeding.

Presentation

24x25x10ml pack size
