

Cipromac-FC Cream

Cipromac-FC Cream is a topical medication used to treat skin infections with antibacterial, anti-inflammatory, and antifungal properties.

Dosage Form

Cream

Route of Administration

Topical

Composition

Each tube contains:

- Ciprofloxacin HCl eq. to Ciprofloxacin 0.5% w/w
- Fluocinolone Acetonide 0.01% w/w
- Clotrimazole 1.0% w/w
- Chlorocresol (as preservative) 0.1% w/w
- Cream base q.s.

Indications

- Mixed skin infections
- Superficial skin infections
- Dermatitis or eczema with secondary bacterial or fungal infections
- Skin conditions involving inflammation, redness, and itching

Storage

Store at a temperature not exceeding 25°C. Do not freeze.

Precautions

- Using multiple topical medications concurrently may increase the risk of skin irritation or decrease the effectiveness of one or more medications.
- Apply different topical products at different times or as directed by the healthcare provider.
- Inform the healthcare provider if using or planning to use other antifungal treatments.
- Using other topical or systemic corticosteroids concurrently may increase the risk of side effects such as skin thinning.

Presentation

10 gm tube
