

Doxoshield-M Tablets

Doxoshield M tablet combines Doxofylline (a bronchodilator) and Montelukast (a leukotriene receptor antagonist) to help manage asthma, COPD, and allergic airway conditions. It works by relaxing airway muscles and reducing inflammation, making breathing easier and controlling allergy symptoms.

Dosage Form

Tablet

Route of Administration

Oral

Composition

Each uncoated bilayered tablet contains:

- Doxofylline (as sustained release form) I.P. 400 mg
- Montelukast Sodium Equivalent to Montelukast I.P. 10 mg
- Excipients q.s.

Indications

Doxoshield M tablet is indicated for the management of respiratory conditions associated with airway inflammation and bronchoconstriction, including Chronic Obstructive Pulmonary Disease (COPD), bronchial asthma (including prevention of exercise-induced bronchoconstriction), allergic rhinitis, chronic bronchitis, and related respiratory disorders.

Storage

Store in a dry place at a temperature not exceeding 30°C. Protect from light. Keep out of reach of children.

Precautions

Do not use for the treatment of acute asthma attacks. Keep a rescue inhaler available for emergency situations. Use with caution in patients with liver impairment. Monitor for allergic reactions such as rash, itching, or swelling. Use during pregnancy and breastfeeding only under medical supervision and when clearly needed.

Presentation

1x10 tablets
