

Threeclotrim 15g Cream

Threeclotrim Cream is a topical medication offering anti-inflammatory, antifungal, and antibacterial actions for the treatment of skin conditions involving inflammation, fungal infections, and bacterial complications.

Dosage Form

Cream

Route of Administration

Topical

Composition

Each tube contains:

- Betamethasone Dipropionate eq. to Betamethasone 0.05% w/w
- Clotrimazole 1.0% w/w
- Neomycin Sulphate 0.5% w/w
- Cream Base q.s.

Indications

Indicated for the relief of inflammatory manifestations of corticosteroid-responsive dermatoses when complicated by secondary bacterial and fungal infections.

Storage

Store below 30°C.

Precautions

- Concurrent use of multiple topical medications may increase the risk of skin irritation.
- Apply different topical products at different times.
- Prolonged or extensive use of corticosteroids such as betamethasone dipropionate can lead to systemic absorption and potential corticosteroid-related side effects.
- Systemic antifungal medications may interact with the antifungal component of the combination.

Presentation

15 gm tube
