

Febutor-80 Tablets

Febutor-80 tablet contains Febuxostat, used to treat chronic hyperuricemia in adults with gout who have an inadequate response to allopurinol.

Dosage Form

Tablet

Route of Administration

Oral

Composition

Each film-coated tablet contains:

- Febuxostat 80 mg
- Excipients q.s.

Indications

Febutor-80 is indicated for the management of chronic hyperuricemia in adults with gout, particularly in patients who have an inadequate response to or are unable to tolerate allopurinol. It helps lower uric acid levels in the blood and reduces the risk of gout attacks and urate crystal formation.

Storage

Store in a cool & dry place. Protect from light.

Precautions

Use this medicine only under the supervision of a physician. Regular monitoring of uric acid levels and liver function may be recommended during treatment. Inform your doctor about any history of heart disease, liver disorders, kidney problems, or other medical conditions before starting therapy. Continue taking the medicine as prescribed, even if gout symptoms improve, and consult your healthcare provider before making any changes to the dosage.

Presentation

1 × 10 Tablets
