

Ferimac XT Tablets

Ferimac-XT Tablets contains Ferrous Ascorbate and Folic Acid. Ferrous Ascorbate is obtained by reacting ascorbic acid and iron. It has excellent absorption as ascorbic acid enhances the absorption of iron. Ascorbic acid reduces ferric iron to ferrous iron which remains soluble even at neutral pH. Folic Acid is a form of water-soluble vitamin B9 and is a key factor in the synthesis of nucleic acid (DNA & RNA). It is vital for the production of healthy red blood cells.

Dosage Form

Tablet

Route of Administration

Oral

Composition

Each film-coated tablet contains:

- Ferrous Ascorbate Equivalent to Elemental Iron 100 mg
- Folic Acid I.P. 1.5 mg
- Excipients q.s.

Indications

Indicated for the treatment of iron deficiency anemia, menorrhagia, and folate deficiency anemia.

Storage

Store in a cool and dark place. Keep out of the reach of children.

Precautions

Use with caution in patients with peptic ulcers, regional enteritis, or ulcerative colitis, as oral iron may aggravate these conditions. Take only as directed by the physician.

Presentation

10x3x10 tablets in a cardboard carton
