

Fungizole-V Cream

Fungizole-V Cream contains Metronidazole and Clotrimazole. It is used for the treatment of mixed bacterial and fungal infections. Clotrimazole acts as an antifungal agent, while Metronidazole provides antibacterial and antiprotozoal action, together offering broad-spectrum relief from itching, irritation, and discharge associated with vaginal infections.

Dosage Form

Cream

Route of Administration

Vaginal

Composition

Each tube contains:

- Metronidazole 10% w/w
- Clotrimazole 2% w/w
- Methylparaben 0.2% w/w
- Preservative 0.1% w/w

Indications

- Vaginitis due to fungi, mainly Candida and/or Trichomonas.
- Superinfection with bacteria sensitive to Gram-positive streptococci/staphylococci and Gram-negative Bacteroides.

Precautions

- Metronidazole is carcinogenic in mice and rats. Unnecessary use of the drug should therefore be avoided.

Presentation

45g tube
