

Fungnizole-V Tablets

Metronidazole is a nitroimidazole antibiotic medication used particularly for anaerobic bacteria and protozoa. Metronidazole is an antibiotic, amebicide, and antiprotozoal. Clotrimazole is a broad-spectrum antifungal that belongs to the class of imidazole and triazole derivatives.

Dosage Form

Tablets

Route of Administration

Oral

Composition

Each uncoated tablet contains:

- Metronidazole B.P. 500 mg
- Clotrimazole B.P. 100 mg
- Lactic Acid Bacillus 150 million spores

Indications

Indicated for vaginitis caused by fungi, mainly Candida, and/or Trichomonas. Also indicated for leucorrhoea-associated infections and bacterial superinfections caused by susceptible organisms.

Storage

Store in a cool, dry place, protected from light and moisture. Keep out of reach of children.

Precautions

- Contraindicated in patients with hypersensitivity to any of the ingredients.
- Use metronidazole only when clinically indicated; avoid unnecessary use.
- Use only as prescribed by a qualified physician.
- Consult a physician if irritation, burning, redness, swelling, or other adverse reactions occur.

Presentation

10 × 6 tablets
