

Healthease Cream

Healthease cream combines a corticosteroid, a vasoconstrictor, and a local anaesthetic to relieve pain, bleeding, and irritation from anal fissures, hemorrhoids, and mild proctitis.

Dosage Form

Cream

Route of Administration

Rectal / Topical

Composition

- Beclomethasone Dipropionate 0.025% w/w
- Phenylephrine Hydrochloride 0.10% w/w
- Lignocaine Hydrochloride 2.50% w/w
- Chlorocresol (Preservative) 0.10% w/w

Indications

Used for the relief of pain and bleeding associated with anal fissures, hemorrhoids (piles), post-hemorrhoidectomy conditions, and mild proctitis. Helps reduce pain, discomfort, burning, swelling, itching, and irritation around the anal area.

Storage

Store at a temperature not exceeding 30°C. Protect from light. Do not freeze. For external use only.

Precautions

For rectal use only. Avoid contact with the eyes and other mucous membranes. Use only as directed by the physician. Prolonged use of corticosteroids may cause local skin reactions. Discontinue use and consult a healthcare professional if irritation or hypersensitivity occurs.

Presentation

30 gm aluminium tube
