

Itromac-200 Capsules (BLISTER)

Itromac-200 capsule contains Itraconazole, a triazole antifungal used to prevent and treat invasive fungal infections including histoplasmosis, blastomycosis, and aspergillosis.

Dosage Form

Capsule

Route of Administration

Oral

Composition

Each hard gelatin capsule contains:

- Itraconazole Pellets eq. to Itraconazole 200 mg
- Excipients q.s.

Titanium Dioxide is used in the pellets; approved colours are used in the empty capsule shell.

Indications

Used for the treatment of pulmonary and extrapulmonary blastomycosis, histoplasmosis, aspergillosis, and onychomycosis in immunocompromised and non-immunocompromised patients.

Storage

Store in a cool and dry place. Protect from light.

Precautions

Use only under medical supervision. Do not use in patients with known hypersensitivity to itraconazole or any of its excipients. Inform the physician about any existing medical conditions and all medicines being taken before starting treatment.

Presentation

10x1x10 capsules in a cardboard carton
