

Ketomac Cream 30gm

Ketomac Cream is a topical antifungal medication used to treat skin conditions such as fungal infections by inhibiting the synthesis of ergosterol in fungal cell membranes.

Dosage Form

Cream

Route of Administration

Topical

Composition

- Ketoconazole I.P. 2% w/w
- Cream base q.s.

Indications

Indicated for the treatment of dermatophyte infections (tinea corporis, tinea cruris, tinea pedis), cutaneous candidiasis, seborrhoeic dermatitis, and pityriasis versicolor.

Storage

Store in a cool and dry place. Protect from light. Do not freeze. For external use only.

Precautions

Use as directed by the physician. Contraindicated in persons with hypersensitivity to ketoconazole or any of the ingredients. Avoid contact with eyes and mucous membranes. Do not cover treated areas with tight-fitting or synthetic clothing. Keep the affected area clean and dry. Do not use other medicated skin products unless prescribed by a physician. Discontinue use and consult a doctor if irritation persists or worsens.

Presentation

30 gm tube
