

Ketomac Cream 15gm

Ketomac Cream is a topical antifungal medication used to treat skin conditions such as fungal infections by inhibiting the synthesis of ergosterol in fungal cell membranes.

Dosage Form

Cream

Route of Administration

Topical

Composition

Each tube contains:

- Ketoconazole 2% w/w
- Cream base q.s.

Indications

Ketomac Cream is indicated for the treatment of various fungal infections, including Dermatophyte infections (tinea corporis, tinea cruris, tinea pedis), Cutaneous candidiasis, Seborrheic dermatitis, and Pityriasis versicolor (tinea versicolor).

Storage

Store in a cool & dry place. Protect from light. Do not freeze.

Precautions

- Avoid covering treated skin areas with tight-fitting, synthetic clothing that does not allow air to circulate to the skin.
- If treating feet, wear clean cotton socks and sandals or shoes that allow for air circulation.
- Keep feet as dry as possible.
- Do not use other medicated skin products unless prescribed by a physician.

Presentation

720 x 15gm tube
