

Medisalic Ointment

Medisalic Ointment combines a corticosteroid and salicylic acid to treat eczema, psoriasis, and related skin conditions, relieving itching, redness, and swelling.

Dosage Form

Ointment

Route of Administration

Topical

Composition

- Clobetasol Propionate I.P. 0.05% w/w
- Salicylic Acid I.P. 3.00% w/w
- Butylated Hydroxytoluene (Preservative) I.P. 0.01% w/w
- Ointment Base q.s.

Indications

Used for the treatment of eczema, psoriasis, dermatoses, and impetigo, helping manage swelling, dry skin, and scaly patches. Also used in autoimmune conditions such as alopecia areata, vitiligo, lichen sclerosis, and lichen planus.

Storage

Store below 25°C. Do not freeze. For external use only.

Precautions

Use under the guidance of a healthcare professional. Prolonged use of clobetasol may cause skin atrophy, striae, and other adverse effects. Avoid contact with the eyes and discontinue use if irritation or hypersensitivity occurs. Consult a healthcare professional before use during pregnancy or breastfeeding.

Presentation

10, 20, 30gm tube
