

Omnimac Spray

Omnimac spray contains Diclofenac diethylamine, which is a non-steroidal anti-inflammatory drug (NSAID) with analgesic and antipyretic properties. Linseed oil is rich in alpha-linolenic acid (ALA). ALA belongs to a group of substances called omega-3 fatty acids, which help to reduce inflammation. Methyl Salicylate acts as a counter-rubefacient by stimulating the superficial afferent nerves from the same spinal segments that supply the painful muscles. Menthol has some local anaesthetic and counterirritant qualities and also acts as a weak kappa opioid receptor agonist, making it an analgesic as well.

Dosage Form

Topical Spray

Route of Administration

Topical

Composition

Diclofenac Diethylamine I.P. 1.16% w/w (Equivalent to Diclofenac Sodium 1% w/w) Linseed Oil B.P. 3% w/w Methyl Salicylate I.P. 10% w/w Menthol I.P. 5% w/w

Indications

Sprains Backache Muscular Pain Soft Tissue Injuries Musculoskeletal Disorders
