

Pantomac-40 Tablets

Pantomac-40 contains Pantoprazole, a proton pump inhibitor used to treat GERD, heartburn, erosive esophagitis, acid peptic disease, and H. pylori infection.

Dosage Form

Gastro-Resistant Tablet

Route of Administration

Oral

Composition

Each gastro-resistant tablet contains:

- Pantoprazole Sodium eq. to Pantoprazole I.P. 40 mg
- Excipients q.s.

Indications

Pantomac-40 Tablet is indicated for the treatment of gastroesophageal reflux disease (GERD), heartburn, erosive esophagitis, acid peptic disease, and conditions associated with excessive gastric acid secretion. It is also used as part of Helicobacter pylori eradication therapy and for the prevention and treatment of NSAID-induced gastric and gastroduodenal ulcers.

Storage

Store protected from moisture at a temperature not exceeding 30°C.

Precautions

Use only as directed by the physician. Long-term use of proton pump inhibitors may increase the risk of vitamin B12 deficiency, low magnesium levels, bone fractures, and kidney-related disorders. Consult your physician before use if you have liver disease or are taking other medications. Seek medical advice if symptoms persist or worsen. Keep out of reach of children.

Presentation

20 × 15 Tablets
