

Pantomac-DSR Capsules

Pantomac-DSR combines sustained-release Pantoprazole and Domperidone pellets to treat dyspepsia and gastro-esophageal reflux disease (GERD).

Dosage Form

Capsule

Route of Administration

Oral

Composition

Each hard gelatin capsule contains:

- Pantoprazole Sodium eq. to Pantoprazole (as enteric-coated pellets) I.P. 40 mg
- Domperidone (as sustained release pellets) I.P. 30 mg
- Excipients q.s.

Indications

Pantomac-DSR is indicated for the treatment and management of dyspepsia and gastro-oesophageal reflux disease (GERD). It helps reduce excess stomach acid production, relieves symptoms such as heartburn and acid reflux, and improves gastrointestinal motility.

Storage

Store in a cool, dry place. Protect from light.

Precautions

Use this medicine only as directed by a physician. Swallow the capsule whole with water and do not chew or crush it. Take the medicine preferably one hour before meals. Inform your doctor if you have liver disease, kidney disease, heart conditions, or are taking any other medications. Long-term use should be under medical supervision, as proton pump inhibitors may be associated with certain adverse effects.

Presentation

20 × 10 Capsules in a cardboard carton
