

Pantomac Tablets

Pantomac tablets contain Pantoprazole, a proton pump inhibitor used to treat gastro-oesophageal reflux disease (GERD) and Zollinger-Ellison syndrome.

Dosage Form

Tablet

Route of Administration

Oral

Composition

Each uncoated tablet contains:

- Pantoprazole Sodium Sesquihydrate eq. to Pantoprazole I.P. 40 mg

Indications

Pantoprazole 40 mg Tablets are indicated for the treatment of gastro-oesophageal reflux disease (GERD), acid-related disorders, and Zollinger-Ellison syndrome. It helps reduce excess stomach acid and provides relief from symptoms such as heartburn, acid reflux, and irritation of the oesophagus.

Storage

Keep out of reach of children. Store in a cool, dry place and protect from light.

Precautions

Use only as directed by the physician. Swallow the tablet whole with water and do not chew or crush it. Take the medicine approximately one hour before meals. Long-term use should be monitored by a healthcare professional. Consult your physician before use if you have liver disease, are pregnant, breastfeeding, or taking other medications. Keep out of reach of children.

Presentation

10 × 10 Tablets in a Cardboard Carton
