

Terbofin-OC Cream 15gm

Terbofin-OC cream is a topical combination for skin conditions, featuring antifungal action (terbinafine) and anti-inflammatory relief (mometasone), effective in treating fungal infections associated with inflammation.

Dosage Form

Cream

Route of Administration

Topical

Composition

Each g contains:

- Terbinafine Hydrochloride I.P. 1.0% w/w
- Mometasone Furoate I.P. 0.1% w/w
- Cream Base q.s.

Indications

Terbofin-OC cream is often prescribed for dermatophyte infections, such as tinea corporis (ringworm), tinea cruris (jock itch), and tinea pedis (athlete's foot). It also provides relief from pain, redness, itching, and burning sensations and speeds up the healing process.

Storage

Store at a temperature not exceeding 30°C. Protected from light. Do not freeze.

Precautions

For external use only. Avoid prolonged use, especially on the face, genital areas, or large skin surfaces. Discontinue use if irritation or hypersensitivity occurs. Use during pregnancy and breastfeeding only under medical supervision. Keep out of reach of children.

Presentation

15 gm tube
