

Torque's Linzolid Tablets

Linezolid is an antibiotic used to treat certain serious bacterial infections. It works by stopping the growth of bacteria. This antibiotic treats only bacterial infections. It will not work for viral infections (such as common cold or flu). Using any antibiotic when it is not needed can cause it to not work for future infections. Linezolid also belongs to a class of drugs known as MAO inhibitors. It can increase the levels of certain natural substances in the body (such as dopamine, norepinephrine, and serotonin), increasing the chance of specific side effects and food and drug interactions.

Dosage Form

Tablet

Route of Administration

Oral

Composition

Each film-coated tablet contains:

- Linezolid I.P. 600 mg
- Excipients q.s.

Indications

Indicated for the treatment of susceptible bacterial infections, including pneumonia and skin infections.
