

Torque's Torcort M40 Dry Injection

Torque's Torcort M40 Injection contains Methylprednisolone, a glucocorticoid used for severe allergic, dermatologic, and rheumatic disorders unresponsive to conventional treatment.

Dosage Form

Injection

Route of Administration

Intramuscular/Intravenous

Composition

Each vial contains:

- Methylprednisolone Sodium Succinate eq. to Methylprednisolone USP 40 mg

Indications

Indicated for severe allergic, dermatologic, endocrine, gastrointestinal, haematologic, neoplastic, nervous system, ophthalmic, renal, respiratory, and rheumatic disorders unresponsive to conventional treatments, localised inflammatory or hypertrophic lesions (e.g. alopecia areata, keloids, psoriatic plaques, ganglia), and acute and chronic joint or soft tissue inflammatory conditions (e.g. arthritis, bursitis, tenosynovitis).

Storage

Store protected from light and moisture, at a temperature not exceeding 25°C.

Precautions

As directed by the physician. Contraindicated in patients with a known allergy to constituents or excipients, and in premature infants. Can interact with oral anticoagulants, cyclosporine, phenobarbital, phenytoin, rifampin, aspirin, ketoconazole, CYP3A4 inhibitors, CYP3A4 inducers, carbamazepine, neuromuscular blocking agents, antidiabetics, and NSAIDs.

Presentation

40 mg vial
