

Torsunate

Torsunate for Injection 30 mg, 60 mg, 120 mg & 180 mg

Dosage Form

Dry Powder Injection

Route of Administration

Intravenous (IV) / Intramuscular (IM)

Composition

Each vial contains:

- Artesunate (Sterile) 120 mg

Indications

- Artesunate is indicated for the treatment of severe malaria caused by Plasmodium falciparum, Plasmodium malariae or Plasmodium ovale.

Storage

Store at a temperature not exceeding 30°C. Protect from light.

Precautions

- Contraindicated in patients with hypersensitivity to artesunate or other artemisinins.
- Artesunate should be used with caution in pregnancy, particularly during the first trimester.
- Patients should be monitored for delayed haemolysis following treatment.
- Local information regarding antimalarial resistance should be considered when selecting an appropriate combination antimalarial regimen.

Presentation

White to almost white crystalline powder filled in a clear glass vial, sealed with a grey butyl rubber stopper and 20 mm blue colour flip-off seal.
