

Torzole-F Cream 15gm

Torzole-F Cream is a topical medication of a corticosteroid and an antifungal agent. It is used to treat various types of skin infections, usually fungal infections. It minimises symptoms of inflammation such as redness, swelling, and itching. It also acts against the infection-causing microorganisms.

Dosage Form

Cream

Route of Administration

Topical

Composition

Each g contains:

- Fluocinolone Acetonide I.P. 0.01% w/w
- Miconazole Nitrate I.P. 2% w/w
- Cream Base q.s.

Indications

Torzole-F cream is indicated for the treatment of inflammatory dermatoses with secondary fungal infections, providing relief from symptoms such as itching, redness, and discomfort on the skin.

Storage

Store it at room temperature and away from excess heat and moisture. Do not freeze.

Precautions

For external use only. Avoid contact with eyes and mucous membranes. Use with caution during pregnancy and breastfeeding. Prolonged use may cause skin atrophy, striae, and other corticosteroid-related adverse effects. Use only as directed by the physician.
