

Winlin Dec-25 Injection - 1ml

Winlin Dec-25 contains Nandrolone Decanoate, an anabolic steroid used to treat anaemias, wasting syndromes, and osteoporosis in menopausal women.

Dosage Form

Injection

Route of Administration

Intramuscular (IM)

Composition

Each 1 ml ampoule contains:

- Nandrolone Decanoate I.P. 25 mg
- Oil Base q.s.

Indications

Used in the treatment of osteoporosis in post-menopausal women, anemia of renal insufficiency, muscle-wasting disorders, and recovery following surgery or treatments causing muscle loss. Helps promote red blood cell production, increase bone density, improve muscle endurance, and support healing.

Storage

Store at 20°C–25°C. Protect from sunlight. Store in the carton until contents are used.

Precautions

Use only under medical supervision. Contraindicated during pregnancy and breastfeeding. Use with caution in patients with a history of prostate cancer, breast cancer, hypercalcemia, or hypersensitivity to nandrolone decanoate. Monitor patients receiving antidiabetic drugs, anticoagulants, or corticosteroids due to potential drug interactions.

Presentation

1 ml ampoule.
